

GLOBAL EMERGENCY MEDICAL REGISTRY

Bleeding Control (BLS) Skill Documentation Form

Candidate (Print): _____ Date: _____

Examiner (Instructor or Licensed Provider): _____

Examiner Signature: _____

Pass _____ Fail _____

Task:	Correct	Incorrect
Applies direct pressure to the wound with gloved hand and/or gloved hand and dressing		
<i>Examiner states wound continues to bleed</i>		
Applies tourniquet (per manufacturer recommendations)		
<i>The examiner must now inform the candidate that the patient is exhibiting signs and symptoms of hypoperfusion.</i>		
Properly positions the patient		
Administers high concentration oxygen		
Initiates steps to prevent heat loss from the patient		
Indicates the need for immediate transportation or ALS backup		

Critical Failure Criteria	
	Failure to apply tourniquet correctly
	Did not apply high concentration of oxygen
	Did not control hemorrhage using correct procedures in a timely manner
	Did not indicate the need for immediate transportation or ALS backup
	Failure to manage the patient as a competent healthcare provider
	Exhibits unacceptable affect with patient or other personnel
	Uses or orders a dangerous or inappropriate intervention
	Failure to complete bleeding control within 5 minutes

NOTE: The “patient” should be supine or reclined with an extremity hemorrhage, and the candidate must have complete supplies (candidate should have time to familiarize themselves with tourniquet system provided).

NOTE: You must factually document any “incorrect” or critical failure criteria on back of this form
