

Bleeding Control - Combat Application Tourniquet (BLS) Skill Documentation Form

Date:

1

Candidate (Print):

Pass Fail	Examiner (Instructor or Licensed Provider):		
Task: Applies direct pressure to the wound with gloved hand and/or gloved hand and dressing Examiner states wound continues to bleed Removes the Combat Application Tourniquet (C-A-T) from the carrying pouch. Slide the wounded extremity through the loop of the C-A-T Self Adhering Band or wrap around extremity. Positioned the C-A-T above wound; leaving at least two (2) inches of uninjured skin between the C-A-T windlass rod until the distal pulse was no longer palpable. Lock the windless rod in place with the C-A-T Windlass Clip. Grasp the C-A-T windlass strap, pull it tight and adhere it to the Velcro on the C-A-T windlass clip. Using a marker, draw a "T" on the casualty's forehead and recorded the date and time the C-A-T was applied. Critical Failure Criteria Failure to apply tourniquet correctly Did not mark the patient with "T" and time Failure to manage the patient as a competent healthcare provider Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention	Examiner Signature:		
Applies direct pressure to the wound with gloved hand and/or gloved hand and dressing Examiner states wound continues to bleed Removes the Combat Application Tourniquet (C-A-T) from the carrying pouch. Slide the wounded extremity through the loop of the C-A-T Self Adhering Band or wrap around extremity. Positioned the C-A-T above wound; leaving at least two (2) inches of uninjured skin between the C-A-T and the wound site. Twist the C-A-T windlass rod until the distal pulse was no longer palpable. Lock the windless rod in place with the C-A-T Windlass Clip. Grasp the C-A-T windlass strap, pull it tight and adhere it to the Velcro on the C-A-T windlass clip. Using a marker, draw a "T" on the casualty's forehead and recorded the date and time the C-A-T was applied. Using a marker, draw a "T" on the casualty's forehead and recorded the date and time the C-A-T was applied. Critical Failure Criteria Failure to apply tourniquet correctly Did not mark the patient with "T" and time Failure to manage the patient as a competent healthcare provider Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention	Task:	Correct	Incorrect
Removes the Combat Application Tourniquet (C-A-T) from the carrying pouch. Slide the wounded extremity through the loop of the C-A-T Self Adhering Band or wrap around extremity. Positioned the C-A-T above wound; leaving at least two (2) inches of uninjured skin between the C-A-T and the wound site. Twist the C-A-T windlass rod until the distal pulse was no longer palpable. Lock the windless rod in place with the C-A-T Windlass Clip. Grasp the C-A-T windlass strap, pull it tight and adhere it to the Velcro on the C-A-T windlass clip. Using a marker, draw a "T" on the casualty's forehead and recorded the date and time the C-A-T was applied. Critical Failure Criteria Failure to apply tourniquet correctly Did not mark the patient with "T" and time Failure to manage the patient as a competent healthcare provider Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention	Applies direct pressure to the wound with gloved hand and/or gloved hand and dressing		
Slide the wounded extremity through the loop of the C-A-T Self Adhering Band or wrap around extremity. Positioned the C-A-T above wound; leaving at least two (2) inches of uninjured skin between the C-A-T and the wound site. Twist the C-A-T windlass rod until the distal pulse was no longer palpable. Lock the windless rod in place with the C-A-T Windlass Clip. Grasp the C-A-T windlass strap, pull it tight and adhere it to the Velcro on the C-A-T windlass clip. Using a marker, draw a "T" on the casualty's forehead and recorded the date and time the C-A-T was applied. Critical Failure Criteria Failure to apply tourniquet correctly Did not mark the patient with "T" and time Failure to manage the patient as a competent healthcare provider Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention	Examiner states wound continues to bleed		
around extremity. Positioned the C-A-T above wound; leaving at least two (2) inches of uninjured skin between the C-A-T and the wound site. Twist the C-A-T windlass rod until the distal pulse was no longer palpable. Lock the windless rod in place with the C-A-T Windlass Clip. Grasp the C-A-T windlass strap, pull it tight and adhere it to the Velcro on the C-A-T windlass clip. Using a marker, draw a "T" on the casualty's forehead and recorded the date and time the C-A-T was applied. Critical Failure Criteria Failure to apply tourniquet correctly Did not mark the patient with "T" and time Failure to manage the patient as a competent healthcare provider Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention	Removes the Combat Application Tourniquet (C-A-T) from the carrying pouch.		
the C-A-T and the wound site. Twist the C-A-T windlass rod until the distal pulse was no longer palpable. Lock the windless rod in place with the C-A-T Windlass Clip. Grasp the C-A-T windlass strap, pull it tight and adhere it to the Velcro on the C-A-T windlass clip. Using a marker, draw a "T" on the casualty's forehead and recorded the date and time the C-A-T was applied. Critical Failure Criteria Failure to apply tourniquet correctly Did not mark the patient with "T" and time Failure to manage the patient as a competent healthcare provider Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention	around extremity.		
Lock the windless rod in place with the C-A-T Windlass Clip. Grasp the C-A-T windlass strap, pull it tight and adhere it to the Velcro on the C-A-T windlass clip. Using a marker, draw a "T" on the casualty's forehead and recorded the date and time the C-A-T was applied. Critical Failure Criteria Failure to apply tourniquet correctly Did not mark the patient with "T" and time Failure to manage the patient as a competent healthcare provider Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention			
Grasp the C-A-T windlass strap, pull it tight and adhere it to the Velcro on the C-A-T windlass clip. Using a marker, draw a "T" on the casualty's forehead and recorded the date and time the C-A-T was applied. Critical Failure Criteria Failure to apply tourniquet correctly Did not mark the patient with "T" and time Failure to manage the patient as a competent healthcare provider Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention	Twist the C-A-T windlass rod until the distal pulse was no longer palpable.		
Windlass clip. Using a marker, draw a "T" on the casualty's forehead and recorded the date and time the C-A-T was applied. Critical Failure Criteria Failure to apply tourniquet correctly Did not mark the patient with "T" and time Failure to manage the patient as a competent healthcare provider Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention	Lock the windless rod in place with the C-A-T Windlass Clip.		
Critical Failure Criteria Failure to apply tourniquet correctly Did not mark the patient with "T" and time Failure to manage the patient as a competent healthcare provider Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention	windlass clip.		
Failure to apply tourniquet correctly Did not mark the patient with "T" and time Failure to manage the patient as a competent healthcare provider Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention			
Did not mark the patient with "T" and time Failure to manage the patient as a competent healthcare provider Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention	<u>Critical Failure Criteria</u>		
Failure to manage the patient as a competent healthcare provider Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention	Failure to apply tourniquet correctly		
Exhibits unacceptable affect with patient or other personnel Uses or orders a dangerous or inappropriate intervention	Did not mark the patient with "T" and time		
Uses or orders a dangerous or inappropriate intervention	Failure to manage the patient as a competent healthcare provider		
	Exhibits unacceptable affect with patient or other personnel		
Failure to complete bleeding control within 5 minutes	Uses or orders a dangerous or inappropriate intervention		

NOTE: The "patient" should be supine or reclined with an extremity hemorrhage, and the candidate must have complete supplies (candidate should have time to familiarize themselves with tourniquet system provided).

NOTE: You must factually document any "incorrect" or critical failure criteria on back of this form
